from all types of Seelan

Next Generation  
Reactive Silicon  
Water-Proofing  
Concentrate Liquid

Nanotechnology  
Protection

Say No To  
Damp Walls

Effective Roof Top  
Waterproofing

### Description :

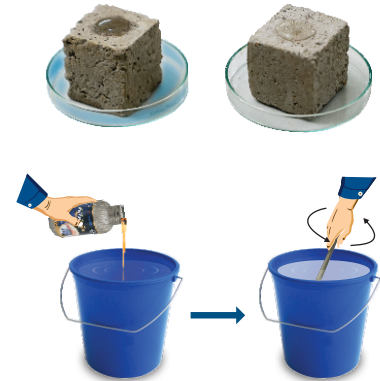

SeelanBlock is next generation reactive silicon based waterproofing concentrate liquid. This concentrated liquid needs to be diluted with 100times water to give most effective, durable and economical waterproofing of most of the structural and soil surfaces. On drying, the applied surface gives water beading effect, It acts by penetrating into applied surfaces using water as carrier liquid and forming ultra strong nano-particle bonding with channel atoms, making the surface completely water repellent.

### Chemical Nature :

Nano-reactive silicon concentrate (Water dilutable).

### Physical Properties :

"Seelan Block" is brownish liquid at room temperature. This product is completely soluble in water. For activation of its unique waterproofing properties, "SeelanBlock" concentrate should be mixed with water in ratio of 1:100 (1 part SeelanBlock mixed with 100 parts water). On stirring, the solution becomes milky white to clear which is ready for application. The water solution of "SeelanBlock" is a free flowing liquid for deeper penetration in application surface.

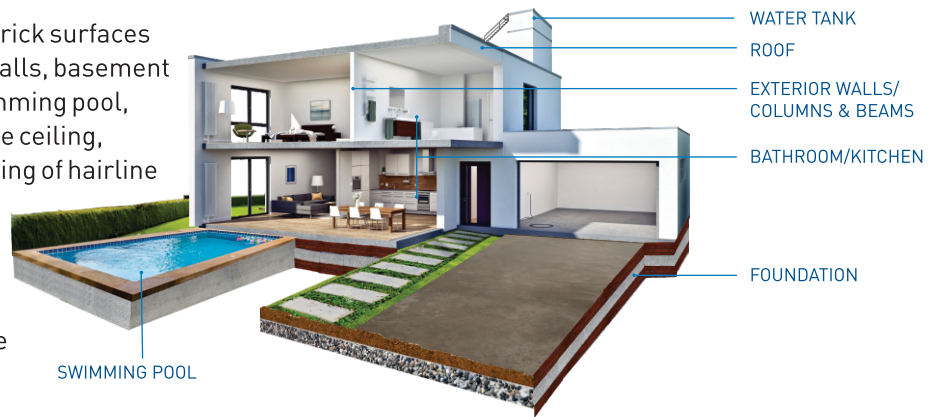

### Mixing :

"SeelanBlock" should be mixed with clean water in ratio of 1:100 before use.

### Recommended Uses :

1. On all external and internal concrete and brick surfaces including terrace slab, flooring, balconies, walls, basement floor & walls, bathrooms, tanks, ponds, swimming pool, artificial water bodies, stones, tiles, POP false ceiling, Wall plastering & putty, masonry ducts, sealing of hairline cracks, roof gardens etc.

2. For Soil waterproofing of basement dug walls, floors, foundation pits & wells, driveway fixing during construction, soil base for flooring, material stacking areas, water channels etc.

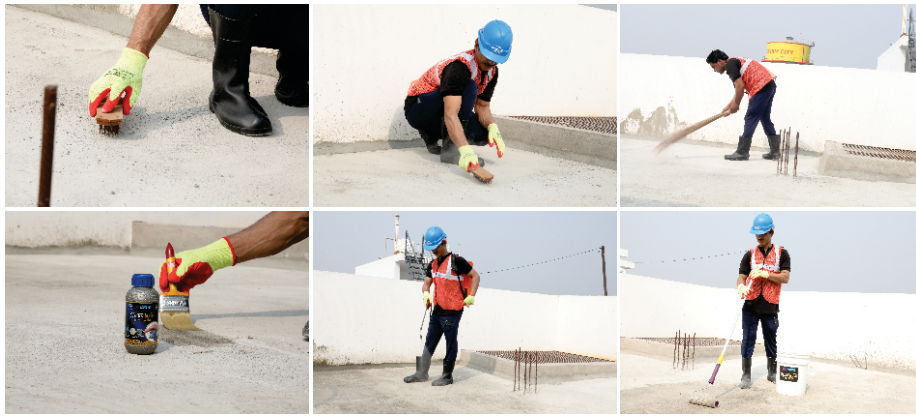

### Advantages :

1. Next Generation reactive silicon waterproofing technology fit even for spacecrafts.
2. 100 times dilution with normal drinking water makes it most economical and effective.
3. No expertise required, dilution and application - **do it yourself (DIY)**.
4. Water acts as carrier for reactive silicon, so it reaches all cracks and crevices and seal them.
5. Water diluted solutions are extremely low in toxicity, so safe during application.
6. Applied surface is non toxic and safe for aquatic creatures.
7. Applied surface do not allow water percolation so it also prevents fungal and algae growth
8. Applied surface do not create slippery conditions, so safe on driveways, floors, terrace etc.
9. After drying, no change in surface color. (surface appears same as earlier)
10. Best value for money, giving best waterproofing at most economical application cost.
11. Fit for waterproofing of soil surfaces, moisture barrier in basements, field irrigation channels, soil water drains, ponds, cart tracks farm roads, soil and hill embankments etc.

### Application :

Water diluted solution of "SeelanBlock" can be applied on any receptive surface including concrete, plasters, soil, POP, White Cement, wall putty etc. On pre-formed, dry surfaces it's better to keep applying this dilute solution using low pressure Spray (Preferred), brush, Roller or splash & wipe method until the surface show free water. Re-application on wet surface provide deeper penetration and better water proofing.

### Cleaning :

All equipments like spray nozzles, roller, brushes etc must be washed immediately after use with clean potable water.

### Packaging:

"SeelanBlcok" is available in 100 ml, 250ml, 500ml and 1Litre HDPE Bottles.

### Coverage Rate :

Depending on porosity of surface, it gives coverage between 1 to 5 sqm./litre of dilute solution.

### Handling Precautions:

"SeelanBlock" is Brown colored low viscosity liquid with unique odour. Water diluted solution is very low in toxicity, however it is advisable to wear goggles and gloves while spraying or other methods of application. Inhalation of spray should be avoided. If the solution is swallowed, medical assistance should be seeked immediately.

### Fire Precautions:

"SeelanBlock" concentrate liquid is flammable, water diluted solutions are not flammable.

- KEEP CONTAINER TIGHTLY CLOSED
- NOT FOR INTERNAL CONSUMPTION

**KEEP OUT OF REACH OF CHILDREN  
FOR INDUSTRIAL USE ONLY**
